

The Cozy Corner – Appointment Booking Mobile App

Project Overview

Project Title

The Cozy Corner – Appointment Booking Mobile App

Project Type

Mobile-first appointment booking application for a café.

Objective

The objective of this project was to design a simple, clean, and user-friendly mobile application that allows customers to quickly reserve appointments or café visits without confusion or lengthy processes.

The application focuses on reducing booking friction, improving customer convenience, and creating a smooth mobile experience for first-time users.

Problem Statement

Many local businesses still rely on:

- Phone calls
- WhatsApp messages
- Manual registers

These traditional booking methods often lead to:

- Missed appointments
- Scheduling confusion
- Delayed responses
- Poor customer experience
- Difficulty managing reservations

The Cozy Corner app was designed to solve these issues by providing a structured and easy appointment booking experience.

Target Users

The application is designed for:

- Café visitors
- Students
- Working professionals
- Customers who prefer advance reservations
- First-time users looking for quick bookings

The primary focus was creating an interface that feels easy, modern, and accessible for all age groups.

Design Goals

The key goals of this project were:

- Create a clean and modern mobile UI
- Minimize the number of steps in the booking process
- Ensure easy navigation on small screens
- Provide clear date and time selection
- Build trust using confirmation and booking details
- Improve overall customer convenience

User Flow

The booking flow was designed to be simple and linear.

User Journey

Splash Screen → Home Screen → Date Selection → Time Slot Selection →
User Information → Booking Confirmation → Booking History

This flow reduces user confusion and helps users complete bookings quickly.

Screen-by-Screen Rationale

1. Welcome / Home Screen

Purpose

The home screen introduces users to the café booking experience.

UX Decisions

- A clean layout was used to avoid overwhelming users.
- Important features such as “Quick Booking” and “Prime Location” were highlighted immediately.
- A large CTA button (“Book Your Visit”) was placed at the bottom for easy thumb reach.
- Minimal text improves readability and visual clarity.

User Benefit

Users can immediately understand the purpose of the app and start booking without confusion.

2. Date Selection Screen

Purpose

Allows users to choose their preferred booking date.

UX Decisions

- A calendar interface was used because it is familiar and intuitive.
- Selected dates are visually highlighted for clarity.
- Adequate spacing improves touch accessibility.
- Simple layout reduces cognitive load.

User Benefit

Users can quickly identify available dates and proceed easily.

3. Time Slot Selection & User Information Screen

Purpose

Enables users to select available time slots and enter booking details.

UX Decisions

- Time slots were displayed in button format for easy tapping.
- Selected slots are visually highlighted.
- Unavailable slots are grayed out to avoid confusion.
- Input fields were designed with clear labels for better usability.
- Optional phone field reduces unnecessary effort.

User Benefit

The booking process becomes faster, clearer, and more efficient.

4. Booking Confirmation Screen

Purpose

Confirms successful appointment booking.

UX Decisions

- Booking details are displayed clearly for transparency.
- Success visuals and celebratory elements improve user satisfaction.
- “Return to Home” and “View Booking History” options improve navigation.
- Confirmation message reassures users that the booking was completed successfully.

User Benefit

Users gain confidence and trust in the system.

5. Booking History Screen

Purpose

Allows users to manage upcoming reservations.

UX Decisions

- Upcoming bookings are shown in card format for readability.
- Reschedule and cancel options improve flexibility.
- A “New Booking” button was added for quick repeat actions.
- Minimal layout helps users focus on important information.

User Benefit

Users can easily manage reservations without contacting the café manually.

UI Design Principles Applied

1. Simplicity

The interface uses minimal elements and clean spacing to avoid visual clutter.

2. Accessibility

Large buttons, readable typography, and proper spacing improve usability for all users.

3. Consistency

Consistent colors, typography, and button styles were maintained throughout the application.

4. Mobile-First Design

The design was optimized specifically for smartphone screens and one-hand interaction.

5. Visual Hierarchy

Important actions such as booking and confirmation were highlighted using larger buttons and stronger contrast.

Color & Typography Choices

Color Palette

- Dark navy was used as the primary color to create a professional and trustworthy appearance.

- Light gray backgrounds improve readability and maintain a clean aesthetic.
- White space was used extensively to improve visual balance.

Typography

Simple and modern typography was selected to:

- Improve readability
- Maintain consistency
- Create a professional mobile app appearance

Challenges Faced

During the design process, the following challenges were considered:

- Keeping the booking process short and simple
- Designing touch-friendly time slots
- Maintaining clarity on small screens
- Balancing aesthetics with usability
- Ensuring smooth navigation between screens

These challenges were addressed through simplified layouts and minimal UI elements.

Real-World Relevance

This project reflects how real businesses can digitize appointment management.

The application can help businesses:

- Reduce missed reservations
- Improve customer convenience
- Organize schedules efficiently
- Save staff time
- Enhance customer satisfaction

This makes the design practical and suitable for real-world implementation.
